

I am writing in reference to the possibility of allowing Low Power FM stations to take over current FM Stations. This affects a radio station that I listen to, a network station known as Air1 (www.air1.com). Air1 serves the public interest of a number of a people in a number of communities. Not only does it provide wholesome music to those tired of the sex and obscenity in today's music, but informs the communities it airs in of community service events and other public service announcements. While the LPFM station that replaces Air1 here in Gainesville may be a Christian station, it is positive to me to experience Air1 as a network of stations. I am also principally opposed to taking away airwaves from those that are already licensed. I feel that the LPFM should only be granted with new airwaves or newly freed frequencies. Please keep stations like Air1 safe in Gainesville and other communities and do not implement the LPFM changes!

Sincerely,
Sean Fowler
Gainesville, FL
